

## Artist Statement

My current work focuses on figures in depressing situations. Sometimes they are celebrities, sometimes they are me, sometimes they are imaginary people or things. I like to place these figures in odd situations or surroundings and see how they react to the space. I often think about how humans fit into this world and how small we actually are compared to the rest of the universe/multiverse. I am very interested in the purpose of human existence. It seems like we do a lot of weird shit for no reason.
